

MassMEP Breakfast Program Introduces...

THE MASSMEP INNOVATION PROGRAM

"Accelerating company growth through technology transfer, professional development & product commercialization."

Learn how your business can participate in this exciting new program.

MassMEP has been awarded a Technical Skills Workforce Development Grant to assist qualified businesses in Massachusetts to access leading edge technologies available at federal laboratories, universities or commercial operations. Hear about the **INNOVATION PROGRAM** and how MassMEP can assist your business.

Implement a lean product development lifecycle

Axiomatic Design Solutions, Inc. will discuss how to stop wasting valuable time and money on design processes that fail to deliver products on time and on budget. Learn how the **INNOVATION PROGRAM** can assist your business in funding the integration of the axiomatic design process.

Date:	Wednesday, August 11, 2004
Time:	7:30AM - 8:00 AM Breakfast, Networking & Registration 8:00AM - 11:00 AM Program & Panel Discussion
Location:	Wyndham Westborough – 508-366-5511 5400 Computer Drive, Westborough, MA 01581
Directions:	www.wyndhamwestborough.com
Registration:	Register online Select Upcoming Events \$20 Fee... Take Action - Register Today! <i>Space is Limited</i>
Contact:	Irene Walczak - MassMEP Innovation Program 617-283-4554

A panel discussion will follow the presentations featuring experts in the axiomatic design process. Panelists include: **Dr. Chris Brown**, Worcester Polytechnic Institute Director, Manufacturing Engineering Program and instructor of axiomatic design; **Dr. Sung-hee Do**, winner 2003 CIRP manufacturing award for axiomatic design; **Matt Pallaver**, CEO Axiomatic Design Solutions, Inc.

Axiomatic Design Process Technology

The axiomatic design process (ADP) was developed at Massachusetts Institute of Technology to provide a reliable product development process that **avoids** wasteful design-build-test-redesign cycles. Both the ADP methodology and its supporting software tool enable manufacturers to dramatically increase the reliability of their product development cycle. This technology has proven to be practical, simple & effective on projects ranging from a single engineer working on a Ford cup holder to teams designing the NASA orbital space plane. www.axiomaticdesign.com

MassMEP Innovation Program

MassMEP, in partnership with Worcester Regional Employment Board, has been awarded a Technical Skills Workforce Development Grant by the US Department of Labor. The MassMEP Innovation Program helps businesses define their capacity to successfully integrate new technologies, assist with technology transfer & develop product commercialization strategies. The Innovation Program has supported the integration of engineering tools such as: ProEngineer, SolidWorks & CATIA. <http://www.massmep.org/>
